

Large wall fountain in reclaimed stones and its 3 water spouts ** SOLD

This rustic wall fountain is a unique garden fountain handcrafted in Provence with reclaimed beautifully weathered-by-time stones. This 3,6 meters long fountain features a narrow rectangular basin resting on a thick overhanging base. This rather deep basin is made of thick curved copings and massive and straight basement stones. The large dressed stone pediment is flanked by two corbels and adorned with a molded breastplate that highlights the 3 wrought iron water outlets. The cornice recalls the curved coping stones.

Height 160 cm

Width 362 cm

Depth 101 cm

- Basin : L 318cm x D 64cm x H 64cm approximately
(inside)
