# Central fountain with two basins in old patinated stones <br> Atelier A.E BIDAL Ta 

This elegant central fountain in natural stone aged and weathered by time presents a tall central column adorned with a magnificent sculpted capital topped by a small stone ball. On one side of this column, a large basin decorated with old copings is watered by an antique water outlet offering a generous flow. On the other side, a smaller basin with 2 metallic bucket-rest bars.
